Alternative Visits:  Shared Medical Appointments
Carolyn Shepherd, MD  12/6/16
Determinants of Health in US:

- Behavioral Patterns: 40%
- Health Care: 10%
- 5% Environmental
- 15% Social Circumstances
- 30% Genetic Predisposition

Schroeder, NEJM 2007;357:1221-8
Kaiser Study on Group Visits

- 30% decrease in emergency department use
- 20% decrease in hospital use/re-admissions
- Delayed entry into nursing facilities
- Decreased visits to specialists
- Increased total visits to primary care
- Decreased same-day visits to primary care
- Increased calls to nurses
- Fewer calls to physicians
- Increased patient satisfaction with care
- Increased physician satisfaction with care
- Decreased cost PMPM by $14.79

Group Visit Types

1. Access Groups-With PCP/Team
   - Goal is to improve access
     • Episodic demand exceeds supply
   - Leadership focus is on didactic education.
     • WCC, Newborn, Diabetes Eye Screening, Cold & Flu, Financial screening

2. Continuity Groups-Always with the PCP/Team

PBS News Hour: https://www.youtube.com/watch?v=wPlCn5zkSys
Continuity Group Visits

- Goal-activation & engagement
- Replace a one-on-one visit
- Care setting in space designed for groups
- Patients remain in same group for continuity
- Target pts not thriving in traditional settings
  - Poorly controlled chronic disease
  - Unexpected utilization patterns
  - Social isolation and depression
- Facilitated group process
Clinica Group Visit Offerings

**Continuity Groups**
- Asthma
- ADHD
- Patients on Warfarin
- Prenatal care
- Newborn to 2 years
- Diabetes
- Parenting/Girls
- Depression
- Anxiety
- Heart Healthy
- Pain Management Groups

**Access Groups**
- Back to School
- Sports Physicals
- Cold and Flu
- New Patient
- Initial Prenatal
- Eye Exam
Group Visits at Clinica

- 1999 – Began office redesign-WCC GV pilot
- 2001 – Diabetes and 1st prenatal visit
- 2003 – Newborn group visits
- 2004 – Behavioral health groups
- 2005 – CenteringPregnancy™
- 2006 – CenteringParenting™, remodeled to include group visit space
- 2007 – More access groups, New patient, Parenting Girls groups
- 2008-12 – Increased Group visit access & spread model to other sites. Added Chronic Pain Groups.
- 2013 – Four groups every day, >1000 per yr
Essential Elements

1. Teams create group visits-GV committee
2. Create, test, apply checklists to build effective group visits
3. Know what you want to accomplish-urgent temporary need for access or improving patient engagement in chronic disease
4. Create content threads
5. Incorporate activities that engage patients-design patient self-assessment tools
6. Create and use tools to walk you through the process-learn from your PDSAs
Essential Elements, cont.

7. Plan how to recruit and engage the patients

8. Group visit communication plan-who, what, where, when

9. Ensure adequate staff training

10. Systematize tracking of visit logistics-date, locations, clinicians

11. Be prepared for the visit-plan and prep

12. Measure and compare outcomes

13. Ensure adequate staffing
Engaging Patients in Self-Assessment
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Will this group be a Continuity Group Visit or an Access Group Visit?</td>
<td>Ask yourself: Will the patients in this group visit continue to meet with each other as a group (Continuity Group Visit) or will the patients that attend this group visit together for a one-time group visit session only (Access Group Visit)?</td>
</tr>
<tr>
<td>Which patients should be included in this group visit?</td>
<td>Ask yourself: For the group visit we are designing, which patients should we target to invite to the group visit? Example: what ages, gender, diagnosis, etc.</td>
</tr>
<tr>
<td>What employees need to be included in this group and how many of each type?</td>
<td>Ask yourself: What staff do we need in order to conduct the care that is being provided at the group visit? Based on the number of patients that will be scheduled, how many of each employee will we need at the group to ensure a smooth running group visit?</td>
</tr>
<tr>
<td>What is the minimum and maximum number of patients that should be included in the group visit?</td>
<td>Ask yourself: Based on the group visit type, what is the maximum number of patients the provider can handle efficiently? How few patients can be scheduled before the ratio drops below a one-to-one ratio, after which it would no longer warrant a group setting?</td>
</tr>
<tr>
<td>How often will the group visit occur?</td>
<td>Ask yourself: What are the needs of this group and how often do we want or need the group to be scheduled? Is there a clinical factor that dictates how often the group visit should occur or is it based on demand management? Is this a Continuity Group Visit or an Access Group Visit?</td>
</tr>
<tr>
<td>What is the total length of the group visit for the patient? (Arrival time – Departure time)</td>
<td>Ask yourself: How long do we anticipate that the patient will be at the group visit from arrival to departure. Are there clinical indicators that will dictate the length of this visit? How long will we need to reserve the group visit room?</td>
</tr>
<tr>
<td>What is the total length of the group visit for each staff member? (Arrival time – Departure time)</td>
<td>Ask yourself: Do all staff need to be at the group the entire visit or can some employees complete required tasks and leave the group visit?</td>
</tr>
<tr>
<td>At what point in the visit should each employee arrive to the group visit?</td>
<td>Ask yourself: If not all staff need to be there for the entire group visit, does it make sense to stagger the time that employee’s arrive/depart the group visit? What is the flow of the group from patient check-in through patient departure and which staff need to be at the group and at</td>
</tr>

Face to face encounter-Exam
CMS on Group Visits

The response from CMS was, "...under existing CPT codes and Medicare rules, a physician could furnish a medically necessary face-to-face E/M visit (CPT code 99213 or similar code depending on level of complexity) to a patient that is observed by other patients. From a payment perspective, there is no prohibition on group members observing while a physician provides a service to another beneficiary."
Confidentiality and PHI...

“I like that I can share different experiences with other women such as sadness, emotion. I feel I am not alone.”

“Rosa” 2009
Confidentiality Agreement
Privacy is something everyone is concerned about when they come for a group medical appointment. You have the right to expect that what is said here be private and confidential. Along with our commitment to maintain your privacy, you will also have a responsibility to respect and protect each other’s privacy.

Please share useful information outside the group, but what you hear and lean about individual group members is private and should not be shared.

Why do Group Visits?

• Not because they are more productive (they are)
• Not because they are easier (they aren’t)
• But because they are better for some of your patients
“Interaction is the heart of planned care”

Levels of patient and team engagement.
  – Brief transactional visit
  – Acknowledgement of psychosocial context
  – Reflection, goal setting and coaching
Transformational
