

# Welcome Back!

Say hi to others, get some breakfast  
and get settled.

Be ready to start at 8:55a

# Welcome Back!

Your 30-second share this morning:

- (1) What is your project about?
- (2) One insight or realization you had yesterday that is informing what else you want to learn about.

Keep it tight and clear!

# Communicating - 3 minute version

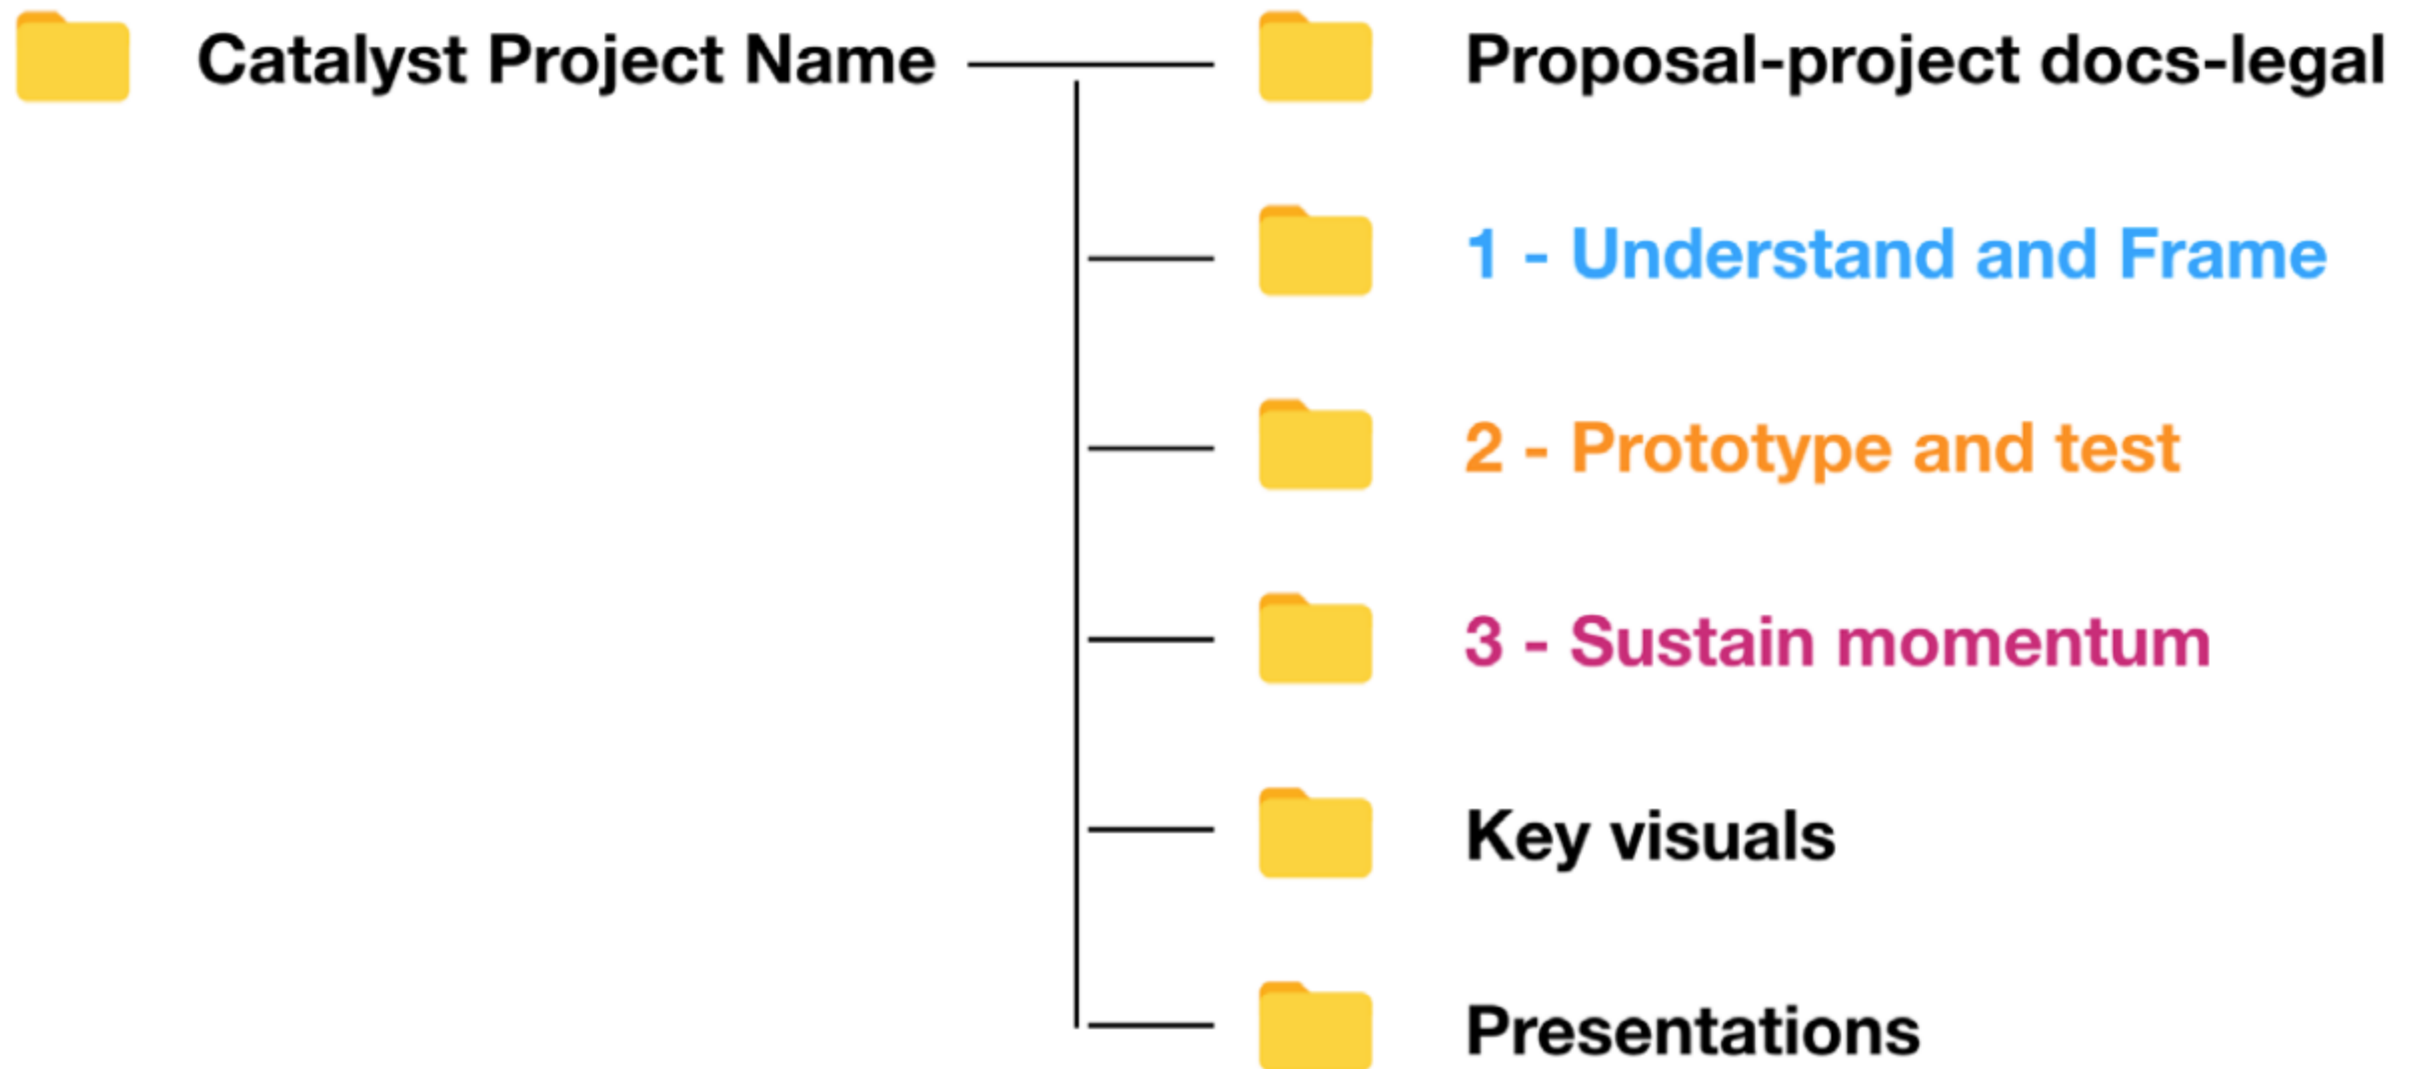

1. Characterize your project's **topic**.
2. Characterize the **objective of your project**.
3. Describe **who** you will talk doing what **activity** and what you want to learn about from them.
4. Describe **other things** you will research and what you hope to learn from them.
5. **Identify what you're most excited/concerned about** in your plan to engage in or learn about your project.

# Organizing and Displaying Project Research

# Find a wall/board for project work

# Organize digital assets

# Organize physical notes, pictures, etc.

# Case Study: Cultivating Workplace Happiness

FEB 21, 2018 • Focus Area: Innovation & Design Thinking • Program: Catalyst

Written by: Center for Care Innovations

## Cultivating Workplace Happiness

Research has shown that a happy, satisfied workforce increases staff productivity. And in a health care setting, that translates into patient satisfaction. In our 2017 cycle of **Catalyst**, Alameda Health System began piloting a solution to increase staff satisfaction.

### Catalyst Project Notes

--Raffle for a runner-up prize? OR 1st, 2nd, 3rd prize?

No Good Deed Goes Unnoticed Meeting Notes 8/24/17:  
 Debrief on No Good Deed Goes Unnoticed Ceremony:

- Leslie discussed the Monopoly money system that they use are her husband's work: incentive program where managers give Monopoly money for prizes (point system)
- Feedback has been positive, people felt "warm and fuzzy"
- Good to do it in front of the whole clinic
- Goal is to recognize people
- Outer limits needs a pot--Carima will own this
- Thinking about having a wall of fame with winner's pictures
- Better messaging about having people turning in their money
- Discussed having our next "ceremony" at downtime mtg in Sept--we will select/showcase a new group of people, will try to make sure that all groups (outer limits, ECs, etc.) will get recognized

### Types of Early Indicators

Input, process and output indicators; represent progress toward a solution's goals.

**Output Indicators**  
 Quantity/Quality of services produced and delivered, efficiency of service production and delivery, experience/impact of delivering and receiving services (number of people served, satisfaction rating, utilization).

**Input Indicators**  
 Resources (people, financial) devoted to the program or solution (i.e., number of case workers, providers, front office staff).  
 Characteristics of target populations (number/ types of patients eligible for the solution).

# Analyzing Qualitative Research

## **Grounded Theory, Glaser & Strauss**

Grounded theory comes from gathering, thinking about and explaining situations from rich, qualitative data.

## Four modes of awareness

1. Closed
2. Suspected
3. Mutual pretense
4. Open

Stakeholders in each mode of awareness of imminent death had distinct behaviors and strategies to cope with the situation.

# Constant Comparative Method

The analytical approach to creating grounded theory.

Identify concepts in the data and constantly compare them to additional data to reinforce or negate the concept.

## How to:

Write out facts, insights, quotes, on individual sticky notes from your research.

Then use affinity sorts to group your sticky note data. (Patterns, consistent behavior, set ups, pain points, etc.)

Give these concepts names. Find additional evidence to reinforce or negate the idea.

Settle on a small number of concepts, organized hierarchically with supporting evidence.

Construct a narrative that explains what happens, why it happens and implications for change.

# An Example

**transitions &  
recovery**

How can we characterize the  
experience of people transitioning  
from hospital care?

resp	for using a	TOTAL BILLED
TYPE OF SERVICE		128

bottom up & top down analysis

# How to Analyze Qualitative Data

- Focus on an activity/phenomenon you wish to understand.
- Gather data across many dimensions through observation, show-and-tell interviews, participation.
- With a small team, go through the data. Characterize what actually happens. (Affinity Sort, Journey Map)
- Identify concepts and themes in the data. What is challenging? What are different patterns of behavior?
- Categorize the concepts and themes in a hierarchy and illustrate with examples from the data.

# Review and discussion

# Personas

# Personas

Characterize who you are designing for

# What is a Persona?

- A persona is a document that characterizes a group of end users with similar needs
- It is built from interviews you have completed with real-life end users
- It captures their behavior, attitudes, challenges and needs
- It is used to communicate and maintain awareness of these end-users throughout your project

# Catalyst Example: A Better Prenatal Care Experience

Tired Trisha

## Demographics

- Adult female (25-35 years old)
- Third Pregnancy
- Married/stable partner

## Attitudes

- Tired/Overwhelmed: with a family, two kids, often a job, and now a pregnancy, she is physically and emotionally exhausted
- Scared: "I was afraid because I did not know how my kids would react [to having a new sibling]"
- Worried about future of family's wellbeing- education and finances

## Behaviors related to prenatal care

- Attends appointments even though she wishes that she did not have to spend as much time at the clinic
- Is confident in her own knowledge/experience of caring for her baby but also knows that there are always new things to learn
- Is not afraid to ask questions about anything - The good, the bad, and the ugly. Knows that the clinic is a safe place and that staff will not judge her.

## Needs/Goals/Motivations related to prenatal care

- Highest concern is the safety of her baby
- Worries about taking care of her other kids as well
- Would like to minimize time at the clinic, without impacting care

# Teach Me TINA

## LEARNING FOCUSED Teacher

**Title:** Science Teacher  
**Company Name:** Crabapple Middle School

**Industry:**  
**Location:** Roswell, Georgia

**Education:**

**Description:** Crabapple Middle School has enjoyed twenty plus years of excellent education since its opening in 1991. In 1985, Crabapple Middle became Fulton County's first National School of Excellence and a State School of Excellence in 2000. Crabapple Middle was recognized as one of the best Georgia middle schools to visit for its excellent middle school education.

"Tell me more! I need Internet at home and in my classroom. So, it's got to work. When I do have trouble, though, I want to be able to fix it quickly on my own."

My school continuously strives to be a premier educational institution in the state of Georgia. Technology is now a part of our everyday lives, so I use technology and the Internet in my classroom. I use it for personal projects, but also for classroom projects with all of my students. When in a classroom with 30 middle school kids, I don't have time to call the DSL provider if I have trouble with the connection. So, I need to be able to troubleshoot problems on my own right there on site. If I have too many connection problems, I will report it to our school principal and recommend that we use a different DSL provider. As Teachers, we don't have a lot of time to deal with extra problems outside of our everyday class.

At home, I use the Internet to do research for the book I am writing. I am also an avid cook, so I connect almost every evening to get our recipes and view the recipes I've saved online. When I am at home, I have a little bit more time to troubleshoot if needed. And, I do prefer to fix the problem myself, if possible.

This user has a high need for connection and a moderately high willingness to troubleshoot problems when they arise. She is interested in what is happening and why the function is being performed. She wants to learn about her computer and DSL. Tina will study simple wiring diagrams, try to check connections and will download DSL software. She wants to learn more computer jargon, but explanations may be needed. She may also use a chat for customer support, to learn how to fix her DSL connection in her classroom or at home by herself.

**KEY VALUES**

- Learning
- Educating and knowing
- Autonomy

**CONNECTION NEEDS**

Is the classroom, for both personal and classroom use.

At home, for personal, with learning and teaching email.

Connection needs to be used at the level of the user's own computer.

**QUESTIONS ASKED WHEN CONSIDERING A PROVIDER**

- "How reliable is the service in providing access to the service I need for me?"
- "Do they provide information on why my connection?"
- "Do they provide a clear and useful troubleshooting tool?"
- "Do they connect when I approach my tech support?"

**EMPLOYMENT**

- Works at Crabapple Middle School, Science Teacher, in Atlanta, Georgia, United States.

**TECH SAVVY**

- Knows some computer jargon, but may need further explanations for some terms and concepts.

**COMMUNICATION PREFERENCES**

- Likes seeing icons, photos and other visual information pertaining to her DSL connection.
- Appreciates being able to see what updates and new features from the status page.
- Wants to be updated via email or a message page to her internet connection.
- Wants to be notified about any updates and upgrades and will update her computer user profile. May look at other devices to troubleshoot the problem if it is needed.

**SUPPORT PREFERENCES**

- Wishes for a chat or video customer support with a person to assist.
- Will use a tutorial, especially one that will be easy to read and will read it carefully, applying knowledge to other areas of the company's products.
- Requests a self-help tool which will be available for several hours, possibly during the school.
- Will only call customer support if all other options are exhausted.

**SECURITY CONCERNS**

- Implements security and will use it, if they are provided for her.
- Wants to be able to see personal security and appreciate any problem that helps her with password security.

UserInsight.

### Low Tech NGO

# Chike (34)

## Project Manager

Chike is a **Nigerian local** with an **undergrad degree in Political Science**. His passion has always been to use what he learns to help his country, and now he's ready to put his new skills to work.

He recently started working for a non-profit organisation focused on **coordinating disaster recovery assistance** all over the country. They received some grant funding from the US and UK, and they're under constant pressure to **explain and justify how they use their funds**.

The learning curve has been steep, but Chike is **passionate and driven**, and he wants to get things done quickly and with **as little budget as possible**.

He sees **big potential for using Vumi Go** to connect to the people they are trying to help, but he's not sure if he can afford it, and if he has the technical skills required to make it a success.

I don't want to mess around. I need a cheap, easy way to communicate with the people we're trying to help.

- ### GOALS
- Easy account and campaign setup.
  - Cheap messaging.
  - Minimal maintenance time required.

# Persona Name

*"A quote that captures an important point of view from the persona relevant to the project topic."*

## ABOUT

Age:

Work:

Family:

Location:

Education:

## Background

A couple of paragraphs that provide an understanding of who the persona is, relevant background info and how they relate to the project topic.

A couple of paragraphs that provide an understanding of who the persona is, relevant background info and how they relate to the project topic.

## Motivations

A paragraph or list of what drives this persona – care for others, ambition, doing well, being fair, etc.

## Goals/Desires

A few sentences or bullet list of their goals of desires as they relate to the project area

*"Another quote with the persona's priority need or suggestion."*

## Frustrations/Needs

A few sentences or bullet list of their frustrations in the project area and what they need.

## Dimensions

lo hi

lo hi

lo hi

lo hi

## 2 x 2 Diagram

# How-to

- Conduct show-and-tell interviews to capture rich information about your users.
- On sticky notes, populate the different categories of your user persona with information from your user interviews.
- Use affinity sorting to cluster the sticky notes into two or more different draft personas.
- Write in other aspects of the personas, inspired by your real users, to flesh out final personas.

**Q&A**

**Comments**

# Journey Mapping

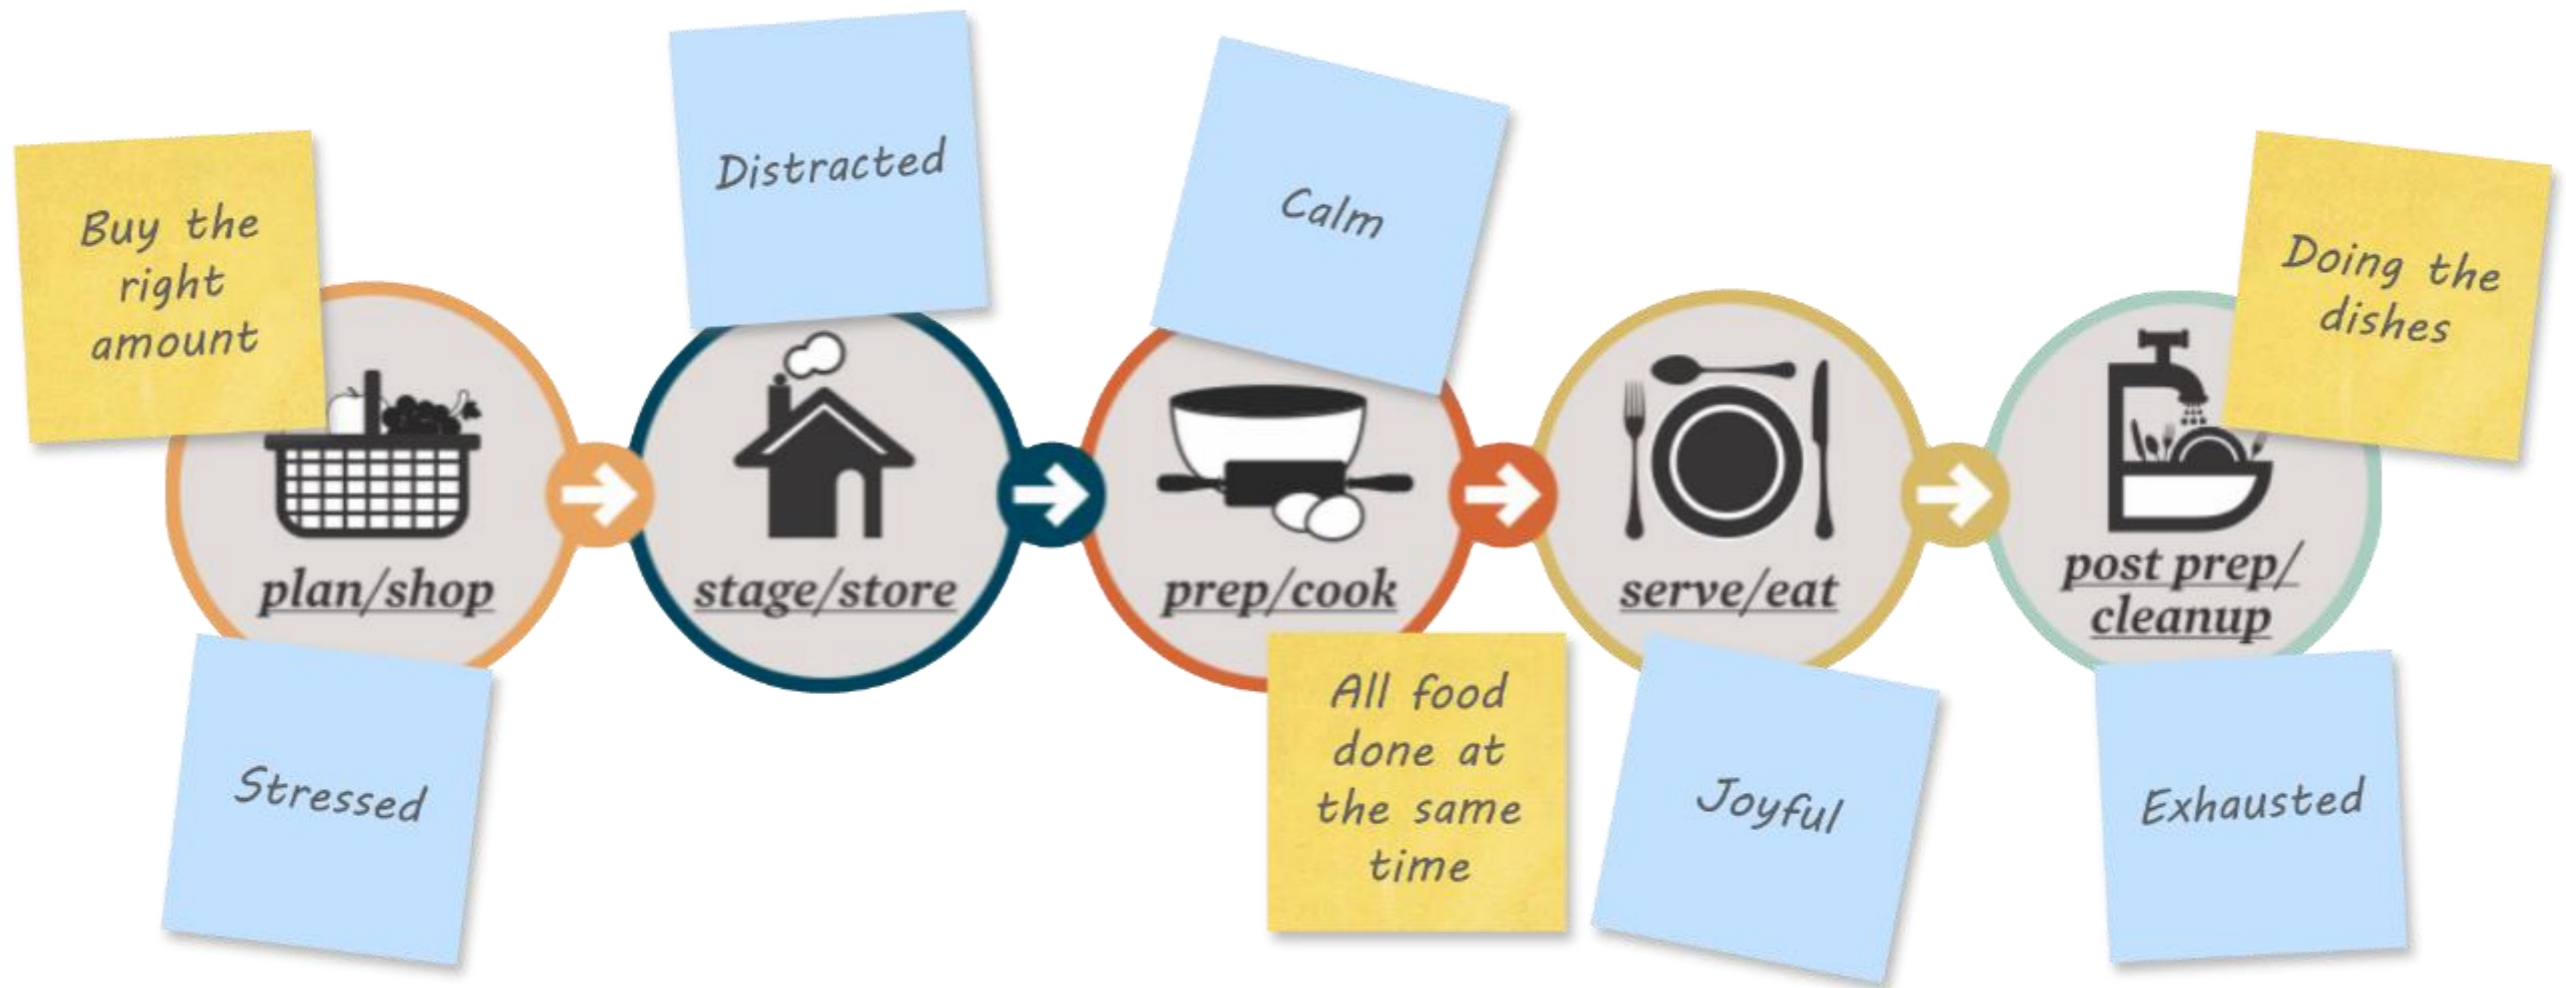

# What's a Journey Map?

- A **flow chart** of a user's experience
- Made up of **core activities**
- **Layered** with important information like **feelings, interactions, and pain points**

# Why Use A Journey Map?

- Infuses **process** with **human stories**
- Makes user experience **tangible** and easy to share
- Weaves different kinds of information into **one diagram**
- Offers **spring board** for solutions and strategy

# Principles of Journey Mapping

- Interviews and observations are your foundation
- Start simply, then add on and remake the map as you learn
- Display relevant information thoughtfully and creatively
- Show users your map to get feedback

# Coach Share

Tabitha Thomas  
Consultant, Formerly w/ WEAVE

# Case Study: Caring for the Caregivers

JAN 17, 2019 • Focus Area: Innovation & Design Thinking • Program: Catalyst

**WEAVE**, a Sacramento-based nonprofit organization, is the primary provider of crisis-intervention services for survivors of domestic violence and sexual assault in Sacramento County, and the county's only rape crisis center.

As part of its mission, WEAVE provides comprehensive services to victims of sex trafficking, many of whom are children. Direct service staff who work with this population are at high risk of vicarious trauma and burnout, and job turnover is high. One of WEAVE's primary goal is to build, grow, and sustain a movement to end sex trafficking once and for all, but to do so organization staff realized they needed to provide more support for those working directly with sex-trafficking victims and survivors.

[careinnovations.org/wearecatalysts/resources](https://careinnovations.org/wearecatalysts/resources)

# Activity - Journey Map

30 minutes

1. Choose a user journey for your project
2. List key activities user *does*
3. Order them from left to right
4. Label "stages" of related activities
5. Add in "layers" of information
  - Thoughts, feelings, pain points, quotes, etc.

# Reflection

- How did it go?
- What's challenging about it?
- What value do you see in it?
- How could you apply it to your project?

# Convention & Orthodoxies

## Convention:

“a way in which something is usually done, especially within a particular area or activity.”

## Orthodoxies:

“Tightly-held beliefs that guide an organization’s decisions and their interpretation of new information.”

# Class rooms

# Banks

# Employment services

VELT HOSPITAL

Roosevelt

- #1 STAMP CARD
- #2 FILL OUT CARD
- #3 PASS CARD THRU WINDOW
- #4 HAVE A SEAT - WAIT TO BE CALLED

CPEP

# Waiting rooms

# What's good about conventions and orthodoxies?

**When can they be bad?**

# **Why is it hard to change them?**

## Why it's important to be able to identify

- Convention is stable but the world is changing quickly
- Organizational memory can be faulty - some things aren't meant to be conventions at all!
- New value creation often comes from challenging convention

## A few points

- The first goal is to identify without judgement
- There are **internal** ones, specific to the organization
- And **external** ones, common to the industry
- They exist on many **levels**
- Challenging convention needs to be done with respect and curiosity

## How to recognize them

- Dig deeper into iconic stories of the organization
- Ask "Why is that?" numerous times
- Ask "How do we know that?" numerous times
- When you hear the same phrase from many different people in the organization
- Look for them here: "We can't do that because..." or "We tried that once..."
- Ask your newest colleagues what they see as strong beliefs in the organization

**Let's apply this to your  
project!**

## Conventions and orthodoxies

1. With your team, brainstorm conventions and orthodoxies related to your project - use a sticky note for each one. (10 min.)
2. Consider internal, industry and cultural ones.
3. Identify a few that might be worth questioning.
4. Find another team and share your results with each other. Encourage the other team to add to your own list! (10 min.)

# Review and discussion

# Project Scoping

## Assessing your project's scope

1. Many projects become too ambitious.
2. A small project done well is better!
3. Restate what your project is about, re-articulate what you're working on.
4. Identify constraints you have.
5. Don't be vague. | Think small | What can you do in five months?

# Project scope - at this point in your thinking...

- We're working on \_\_\_\_\_
- Our goal is to \_\_\_\_\_
- Key areas of research for us are \_\_\_\_\_, \_\_\_\_\_, & \_\_\_\_\_
- Types of solutions we could come up with are: \_\_\_\_\_
- What we probably can't address is: \_\_\_\_\_

# Project Research Roadmap Planning

# Project planning calendar activity

## Team time: Project Planning & Feedback (45 min)

1. Consider your project definition and areas of design research
2. Work on a calendar plan of your activities over the coming 9 weeks - 30-40 minutes
3. Pitch your project and work plan to two other teams for feedback
4. Discuss in your team to refine approach

# Cross pitch to new teams (30 min)

- Breakout into groups of 2 teams
- Team A pitches their project and shares their initial research plan. (3-4 minutes)
- Team B listens, jots notes, questions and feedback on sticky notes.
- When pitch is done, team B gives feedback to team A.
- Team A listens to feedback without defending. Discuss after all feedback has been shared.

# Day 2 Evaluations

# How Might We Statements

# Connecting insights to ideas

- You've done a lot of research and have a structured basis of insights and supporting data.
  - How do you keep from going straight to individual ideas?
  - How do you create many ideas that can be sorted and evaluated?
- > Use "How might we?" questions

# How might we...?

- How might we welcome the clients in more appropriate ways?
- How might we continue serving post partum mothers and their family?
- How might we try new behaviors that improve staff morale?

Try one or two on us...

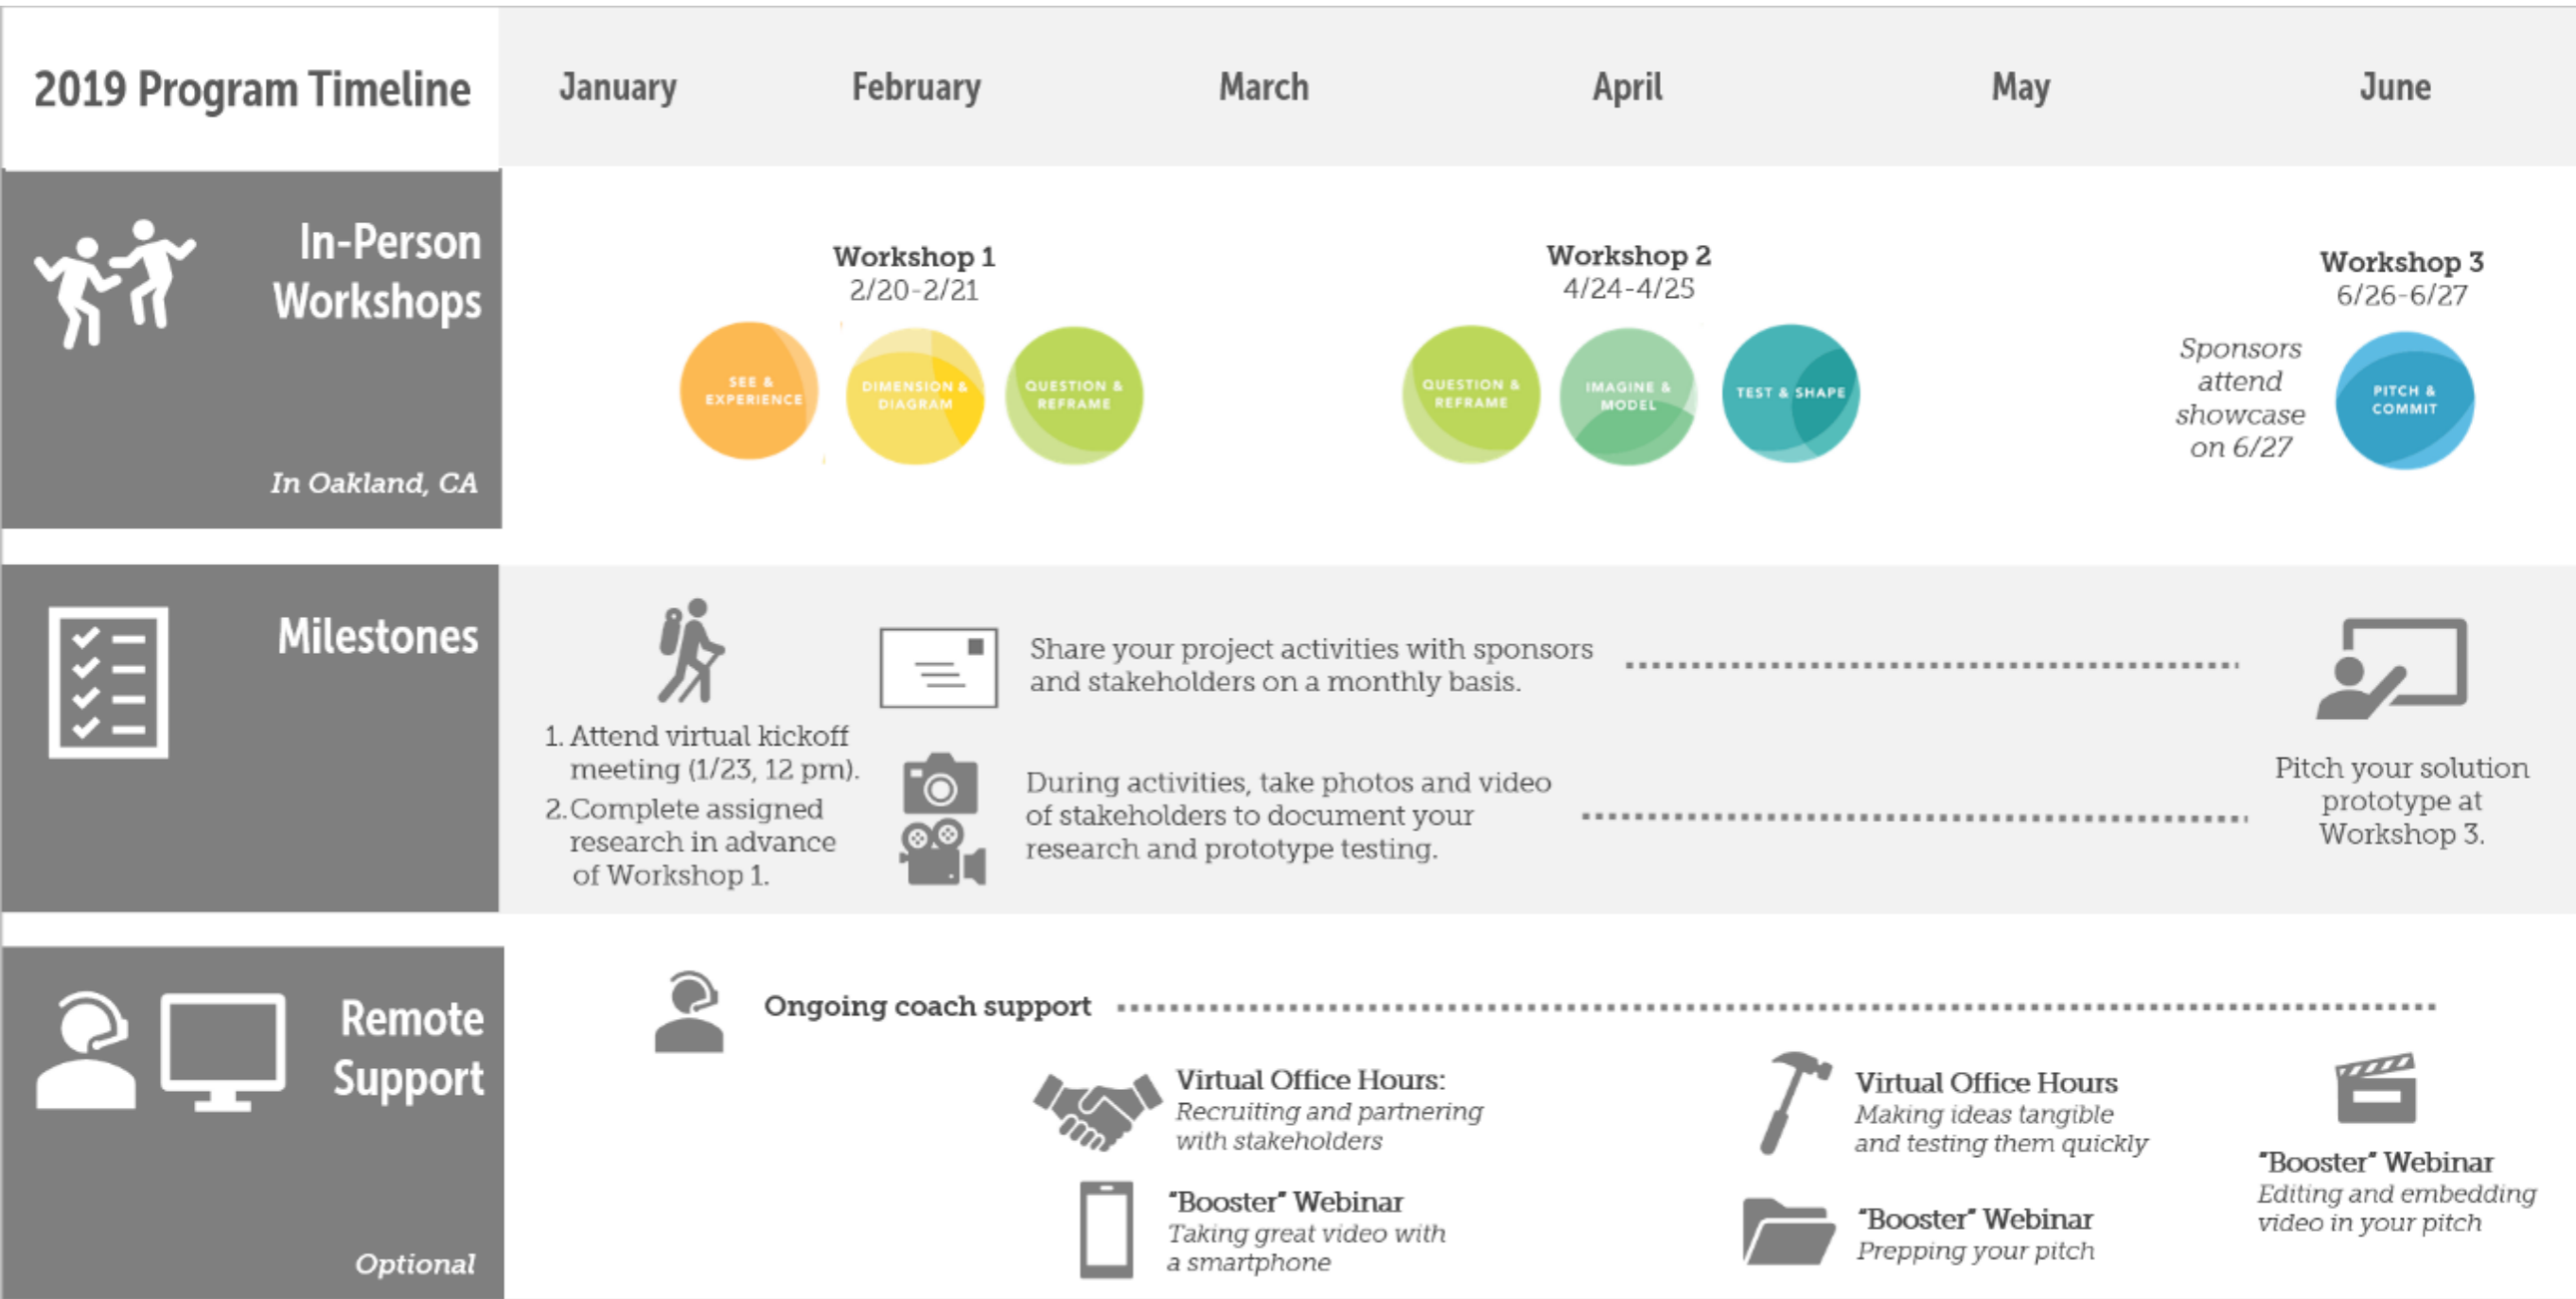

# What's Next?

Team Activities

Program Offerings

Phase 1: February - April

# Collect research "artifacts," send "postcards," ask for help

# Phase 1 Reminders

- ✓ Do the things you lay out in your research plan.
- ✓ Take photos and video (with consent!) during your research activities. These will be helpful for the June showcase.
- ✓ Set aside time regularly to “synthesize” and reflect on what you are learning. Create a visual framework of your key themes and insights to discuss with your sponsor and stakeholders.
- ✓ Narrow in on the pain point(s) you will focus on for the rest of the program. How might you re-frame those challenges so they are articulated as optimistic and collective opportunities (“*How might we...[HMW]*”)?
- ✓ Bring your journey maps/personas, hierarchy narrative (quotes, sub-themes, and major theme), and HMW statements to Workshop 2.

# Upcoming Booster Webinars (optional, dates to be set)

- Design research office hours (Q&A)
  - Recruiting design partners
  - Ethnographic research techniques
  - Organizing research artifacts (quotes, photos, videos)
  - Making sense of your research
- Taking better video with a smartphone
- “How Might We...” Statements
- Maybe more!

All sessions will be recorded and posted to [www.careinnovations.org/wearecatalysts/program](http://www.careinnovations.org/wearecatalysts/program)

# Lean on your coaches!

Use the Google Group to email with others

[catalyst2019@googlegroups.com](mailto:catalyst2019@googlegroups.com)

# Your EVERYTHING: [www.careinnovations.org/wearecatalysts](http://www.careinnovations.org/wearecatalysts)

The screenshot shows the Catalyst Community website landing page. At the top left is the CCI logo (Center for Care Innovations) with a colorful starburst icon. To the right of the logo are two columns of menu items: Population Health, Data Analytics, and Innovation & Design Thinking; and Technology Solutions, Delivery System Reform, and Community-Centered Care. Further right are links for ABOUT, PROGRAMS, GET INVOLVED, and a search icon. A prominent orange button labeled 'The Resource Center' is positioned below these links. The main header area has a blue background with a pattern of circles and contains the text 'STAY UP-TO-DATE!' and 'Catalyst Community'. Below this is a navigation bar with tabs for OVERVIEW, MEET YOUR COMMUNITY, PROGRAM ACTIVITIES, RESOURCE LIBRARY, and COACH CORNER. The main content area features a 'WELCOME, CATALYSTS!' heading, a paragraph explaining the site's purpose as a support center for Catalyst teams, and a link to the 'program page' for more information.

# Take home your Catalyst goody bags!

# Thank you, and onward!
