

UCSF Fresno Medical Education Program

UCSF Fresno Medical Education Program

Pediatrics, Family Medicine, & OB/GYN

- Fresno (Central SJV)
- Serve 14,120 Medi-Cal Patients Annually
 - 48% children
 - 49% under 65
 - 3% over 65
 - 4% OB
 - EPIC

UCSF Fresno has implemented a Trauma-Informed framework into our resident training and our clinical practice

We have a centralized medical home that is physically set up to carry out this QI initiative.

Our CALQIC Team

Ila Naeni, DO

Associate Program Director
Family and Community Medicine

Amy Parks, DSW, LCSW

Project Lead, DBP Faculty
Department of Pediatrics

Ellen Middleton, PhD, NP

Obstetrics and Gynecology

Jacquelynn Wagoner, DO

Assistant Clinical Professor
Department of Pediatrics

TBA

Soe Maw, MD

Assistant Clinical Professor
Department of Pediatrics

ACEs Screening and Response

Current Strengths:

Well established medical education center.

Have been screening for development, mental health, and SDOH for over 10 years.

Biggest Challenges:

COVID-19 has changed the clinic staffing.

Areas of Greatest Uncertainty:

The collateral damage from COVID-19.

Our Wonderings

We would like to learn from others how they have incorporated ACEs/PEARLS screening efficiently and effectively with other clinic screening tools?

One question for coaches and faculty is with changes in clinic staffing due to COVID-19, how can we ensure continued support from clinic administration?

We may need support with how to effectively utilize EPIC for data collection.

UCSF Fresno is Proud of our Community Collaborations

- Fresno has built a robust network of CBO's and cross sector agencies and in order to make linkages more efficient and effective. Also has increased community networking and built relationships with community partners and residents. (This network has been especially helpful, and possibly life saving, during COVID-19 trying to connect vulnerable families with needed resources)
