

A Day in the Life of Addiction Medicine Clinic

Mark McGrail, MD
Brittany McCafferty, PhD
Cherokee Health Systems

Clinical Components of Addiction Medicine

- Routine primary care for acute and chronic healthcare needs
- Medication management for physical, mental health, and substance misuse
- Individual and group interventions to address behavioral health and substance misuse
- Individual and group support from peers with lived experience
- Linkage to resources to address recovery environment and social determinants of health
- Routine clinical care review (e.g., daily team huddles, team meetings, curbside consultation)
- Care coordination to leverage outside resources/treatment and seamlessly transitioning back to our services when indicated
- Pharmacy consultation

Members of the Addiction Medicine Team

- Addiction Medicine
- Behavioral Health
- Primary Care
- Nursing
- Peer Support
- Community Health Coordinator
- Psychiatry/OB-GYN
- Pharmacy

Addiction Medicine Staff Clinical Roles and Responsibilities

- Addiction Specialist: review referrals with complex medical needs, conduct addiction medicine intake evaluations, treatment planning, DEA X-number, prescribing and monitoring, consultation with primary care providers
- Primary Care Provider: routine preventive and chronic health care, care coordination, medication safety
- Behavioral Health Consultant: assess behavioral health needs and coordinate BH care, triage referrals, provides individual and group behavioral intervention to address behavioral health and substance misuse concerns
- Nursing: screen routine preventive and primary care health needs, urine screens and lab test monitoring, care management and coordination, medication counts for diversion control
- Peer Support Specialist: assist with orienting patients to the organization, advocacy, outreach, co-facilitation of group interventions, individual support and goal-setting, assistance navigating between levels of A&D care
- Community Health Coordinator: assess social determinants of health and coordinate linkage to community resources to support recovery and overall wellness recovery, referral assistance including to higher levels of A&D care
- Pharmacist: TN CSMD report, medication safety and review, problem-solving medication issues

Continuum of Behavioral Health Care

- Individual Behavioral Interventions – *first line during stabilization* and in addition to group interventions in early and later recovery, provided by Behavioral Health Consultant and/or specialty therapist, address comorbid concerns (e.g., depression, anxiety, PTSD) in addition to substance misuse
- Group Therapy – *following stabilization*, length and frequency can vary (EOP 3 hrs 1x/week; IOP 3 hrs 3x/week; Aftercare 90 min 1x/week -1x/month) depending on patient needs for support and structure, utilizing Group Medical Visits for those receiving addiction medicine
- Peer Support – engagement, modeling, coordination of care, self-management skills, emotional support, developing action plans & patient advocacy, group cofacilitation
- Psychiatric Medication Management – consultative or as an adjunct to addiction care, typically provided by PCP or Addiction Specialist unless very psychiatrically complex
- Community Health Coordination – *essential for most during stabilization and in early recovery*, expanded case management role, addressing social determinants of health, care coordination

Pharmacy Consultation with Patient

Things to Consider When Designing Clinical Workflow

Flexibility Helps Improve Flow

Mobility Matters

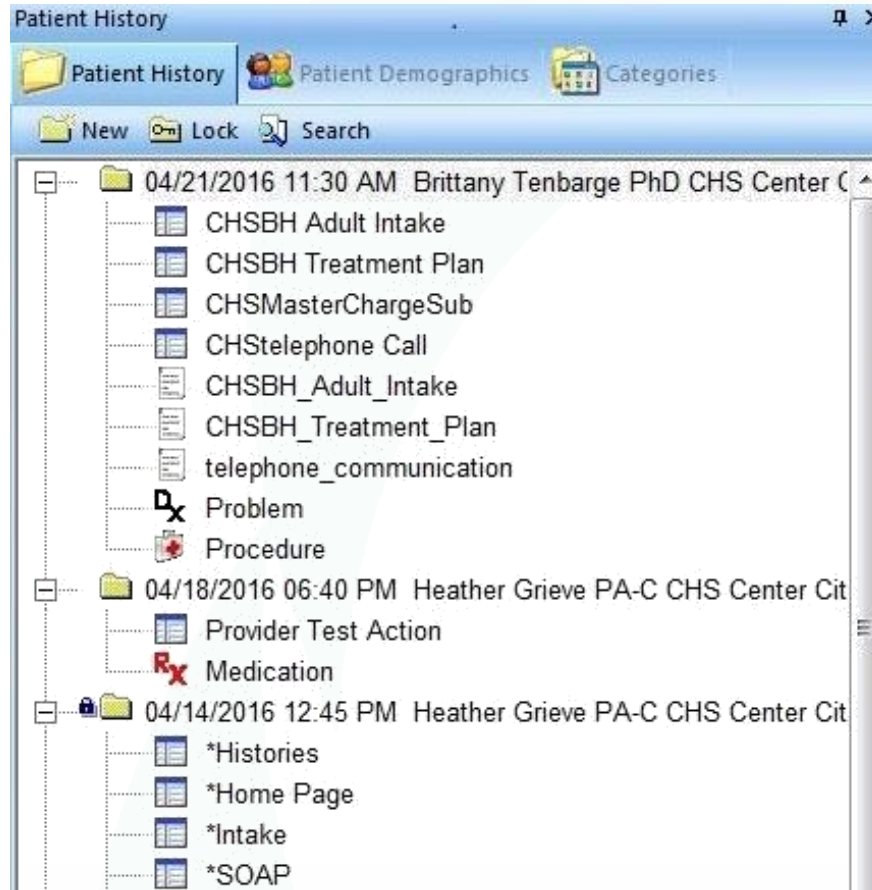

Mobile Devices

- **Laptops/Tablets**
 - *Provides EHR Access*
 - *Improves timeliness of documentation*
 - *Provides Telemedicine capabilities for high-risk patients*
 - *Increases patient access to services and care team*
- **Wireless Phones**
