

YOUR pharmacy made easy

Learn more about the benefits of our hospital pharmacy services, because staying healthy should be easy.

1. PHARMACY IN YOUR HOSPITAL

Having your doctor and pharmacy in one place can be helpful because it...

- Saves you time since you don't have to make a trip to a different pharmacy.
- Makes it easier for you to follow your doctor's treatment plan when you leave the hospital with your medicine in hand.
- Keeps you safe since it's easier for your doctor and pharmacist to work together to make sure the medicine, dose, and instructions are right for you.

2. THE RIGHT MEDICINE AT THE BEST PRICE

As a public hospital, there are some benefits we can offer that other pharmacies can't...

- We have medicine that other pharmacies don't have. Since our hospitals provide specialty care, we keep many of the special medicine they may need, on site.
- We work closely with your health plan to get faster prior authorization (approval), so you get the medicine you need, right away.
- We make sure most medicine is no or low cost to you. We work with your health plan and the pharmaceutical companies and we also have our own County programs to offer you the best prices.

3. PRESCRIPTION REFILLS BY PHONE

We can also help you manage your prescriptions by phone, helping you...

- Remember when it's time for a prescription refill.
- Order a prescription refill.
- Better understand how to take your medicine.
- Know how to renew your prescription through the online patient portal.

4. MEDICINE DELIVERED BY MAIL

Aside from in-person and over-the-phone pharmacy services, we can also send your prescription through the mail.

- We can send a 30 to 90-day prescription refill to your Los Angeles County address (no P.O. boxes). There are some limits to what we can send in the mail.
- Most orders will ship by U.S. Mail or FedEx. It will take 3 to 5 business days for you to get your medicine. The package won't show there's medicine inside.
