

CCI Population Health Learning Network Working Evaluation Logic Model

(*) We are inclined to keep this as a process outcome given the investment in Salesforce, the PHLN Forum, and evaluation question #1. It also reflects the quantity of work that was completed by the PHLN team.

(**) We intentionally kept this at both time points, thinking it would be assessed through annual survey in Y1 and the baseline/endline assessment in Y2, given the value of seeing progress along the way

(***) Contingent on goals and measures for Y2 cohort
