

PHASE 2020-2021 & Beyond

March 23, 2021

The Desired Future

- By December 31, 2022 GVHC aims to improve blood pressure control amongst patients with diabetes from 53% to 58% (550pts)
- Throughout the same time period, GVHC would like to decrease inequities experienced by black patients by prioritizing improvement efforts that result in a change from 50% to 58% (30pts)

Why is the Desired Future Not Possible Now?

Technology

Staffing

Time

Learnings that Will Inform Our Desired Future

Bright Spots/Accomplishments

- Collaborative Approach
- Innovative Solutions: Virtual HTN Health Education
- Clinical Quality Committee

Activities We will Keep Doing Based on Learnings

- Virtual HTN Health Education
- Clinical Quality Committee
- Improving Health Information Technologies

What Else is Possible?

Operational Quality Committee

Access Variety

Self Monitoring Blood Pressure

Patient Registries

Benefits

- Improved Clinical Care Team Engagement
- Improved Access to Care
- Improved Community Health & Patient's Quality of Life

Consequences of Inaction

- Exacerbated Health Conditions
- Continued Inequities
- Increased Hospitalizations & Adverse COVID19 Outcomes
- Decrease in Health Plan Incentive Funds

The Proposal

Dedicate QI Staff time to participate in initiatives aimed to improve Blood Pressure Control

Staffing Request:

- QI Project Manager - .1 FTE
- QI Specialists – 1 FTE (.2FTE x 4 Team Members)

Sample Activities:

- Chart Audits & Onsite Care Team Support
- Operational Quality Committee Participation
- Participation in the Implementation &/or Analysis of New Initiatives
