This Change Agent Crash Course is intended to be led through virtual or in-person facilitation with a group ranging from 2 people to 1,000 (maybe more!). Provocative research and examples will help guide you through these 3 activities in a “pair and share” format. The activity is intended to push your thinking on how you can lead change and help launch your change effort forward.

We hope you have fun with it, learn from it, and most importantly, ignite meaningful change with it. Download a copy at: www.aspenlabsnetwork.com/resources and share your story and any thoughts about the tool with us at hello@aspenlabsnetwork or tag your thoughts and experiences at #profoundchange.
PROFOUND CHANGE  Leading with Courage, Connection and Creativity

Courage

Storyboards

- Write out a few sentences about a change you are seeking (no jargon!)
- Think about the current state and the future state of the change and sketch them out in a storyboard format
- At the announced time you’ll be sharing this exercise with a partner.

What is the change and why do you personally care?

(in words or images)

Example: current state storyboard

Current State

beginning unfolding story crisis or issue crisis or issue implication and emotion

Future State

beginning potential crisis or issue new intervention new intervention implication and emotion

INSPIRATION

"Use storyboarding to move beyond the functional view and into the human story of the experience, to shift the focus to the user and the problem that the new experience could solve."

**Connection**  
Empathy Map

- Based on the change you seek, identify a person for whom you should gain more empathy and understanding.
- Think about what it is like to walk in their shoes, as you will be filling in all 4 quadrants from their perspective.
- Begin with what they say and do, then try to imagine what they may think and feel.
- Finally, capture your own thoughts and insights about their world view after completing this empathy exercise.

Name the person:

**PROFOUND CHANGE**

**Creativity**

**Rapid prototypes**

- Write out a hypothesis about how your change will impact or will be perceived by others
- Create three different ideas, we are calling them minimum viable approaches, that can be tried out quickly in order to test a hypothesis about the change

---

### One hypothesis

What do you believe will occur to a particular target person or audience when you try to create this change?

- **I believe**
  - the target person or audience

- **will**
  - the behavior, action or emotion we are looking for

- **because**
  - why you believe this to be true

---

### Minimum Viable Approach

The smallest standalone release that will:
- Influence the behavior or actions of your target audience
- Teach you something about the change you seek
- Help test a hypothesis

---
