

catalyst workshop

SESSION 1

OCTOBER 24-25, 2019

THE DENVER FOUNDATION

The Power of Philanthropy

The Colorado
Health Foundation™

ABOUT THE CATALYST PROGRAM

The goal of The Catalyst Program is to create a network of trained innovation champions who can help others in their organizations think and work differently by applying design and innovation skill sets to initiatives in their organizations.

The Center for Care Innovations is training and supporting a new class of innovation catalysts. Over the next five months, we will provide opportunities for catalysts to apply human centered design principles to real projects, participate in an online learning community, and collect stories to demonstrate impact and success of the program.

The Catalyst Program is made possible through funding from Colorado Health Foundation, Denver Foundation, Rose Foundation, Colorado Access, Community First Foundation.

Contents

Agenda	6
Welcome, Intros, & Inspiration	9
MINDSETS	
Five Catalyst Mindsets	11
PRINCIPLES	
Six Principles for Working Differently	15
Human Centered Design Project Example	18
ACTIVITIES - DAY 1	
Design Dash	20
Communicating Effectively & Feedback	21
Homework Share: Prep-work & Feedback	22
Design Research 101	23
Beliefs & Assumptions	24
Team Time: Project Planning	25
Day 1 Review & Feedback	27

ACTIVITIES - DAY 2

Welcome Back & Review	30
Pitching Your Project	31
Method: Qualitative Interviewing	32
Method: Journey Mapping	33
Method: Themes & Tensions	34
Method: Reframing with “How Might We...?”	35
Organizing Project Data	36
Project Definition & Resource Planning	37
Postcards From the Field	38
Final Reflection	39

Agenda

DAY 1 // THURSDAY, OCTOBER 24

- 8:30AM** *Breakfast*
- 9:00AM** Welcome
 - Goals
 - Methods taught
 - Words of wisdom
 - Program leads intros
 - Coach and group intros
 - Housekeeping
- 9:40AM** Mindsets
- 10:10AM** Human Centered Design methodology
- 10:30AM** Design Dash
- 12:00PM** *Lunch*
- 1:15PM** Communicating effectively about your work
 - Giving & receiving feedback
- 1:45PM** Homework share and discussion
- 2:30PM** Design Research 101
 - Peer consult
- 3:15PM** Assumptions and Beliefs
- 3:45PM** *Break (w/snack)*
- 4:00PM** Team research, planning, and feedback
- 4:45PM** Wrap up, review, housekeeping
- 5:00PM** *Happy hour (offsite)*

DAY 2 // THURSDAY, OCTOBER 25

- 8:30AM** *Breakfast*
- 9:00AM** Welcome back & review
Reflection
- 9:30AM** Pitching your project
Finish project direction pitches
Share pitches, get feedback, revise
- 10:15AM** Qualitative Interviewing
- 11:15AM** *Break*
- 11:30AM** Journey Mapping
- 12:20PM** *Lunch*
- 1:30PM** Themes & Tensions
- 2:15PM** Reframing Problems/Framing Opportunities
- 3:00PM** *Break (w/snack)*
- 3:15PM** Team planning, project scoping, and feedback
- 4:00PM** Organizing your data
- 4:10PM** Postcards from the Field
- 4:40PM** Review, wrap up, and next steps

NOTES

People ignore design that ignores people. —FRANK CHIMERO

The background consists of several overlapping, curved shapes in various shades of teal and green. A large, light teal shape is in the upper left, overlapping a darker teal shape on the right. Below these, a medium teal shape overlaps a dark green shape in the bottom right corner. The word "MINDSETS" is centered in white, bold, uppercase letters.

MINDSETS

MINDSETS

INCLUSION & EMPATHY

COLLABORATION

**STARTING SMALL,
LEARNING FAST**

MAKING THINGS TANGIBLE

**SHOWING UNFINISHED WORK,
EARLY & OFTEN**

NOTES & REFLECTION

People ignore design that ignores people. —FRANK CHIMERO

You cannot create experience. You must undergo it. —ALBERT CAMUS

NOTES

People ignore design that ignores people. —FRANK CHIMERO

The background consists of several overlapping, semi-transparent shapes in various shades of teal and green. A large, light teal shape is in the upper left, overlapping a darker teal shape on the right. Below these, a medium teal shape overlaps a dark green shape in the bottom right corner. The word "PRINCIPLES" is centered in white, bold, uppercase letters.

PRINCIPLES

NOTES

You cannot create experience. You must undergo it.—ALBERT CAMUS

**SEE &
EXPERIENCE**

**PITCH &
COMMIT**

**DIMENSION &
DIAGRAM**

SIX PRINCIPLES
for
WORKING
DIFFERENTLY

TEST & SHAPE

**QUESTION &
REFRAME**

**IMAGINE &
MODEL**

Human-Centered Design Project Example

Curious what it looks and feels like to do a Catalyst project from start to finish? Learn from folks who have used human-centered design to approach problems collaboratively in their community.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

The background features several overlapping, semi-transparent shapes in various shades of teal and green. A large, light teal shape is in the upper left, a darker teal shape is in the upper right, a medium teal shape is in the lower left, and a dark green shape is in the lower right. The text is centered over these shapes.

ACTIVITIES - DAY 1

DAY 1

Design Dash

In this exercise, you'll participate in a crash course in human centered design. You'll interview, identify themes and tensions, brainstorm, prototype, get feedback, and then prototype again.

The goal of this exercise is to give you hands on practice with the entire HCD process. Don't worry if you feel like your head is spinning a bit—we'll walk you through the steps in more detail over the next few months.

NOTES & REFLECTION

A large grid of dots for taking notes and reflections. The grid consists of 20 columns and 20 rows of small, light blue dots, providing a structured space for writing.

Recognizing the need is the primary condition for design. — EAMES

DAY 1

Communicating Effectively Giving/Receiving Feedback

Innovation is a social and political process. Communicating effectively about your project helps others support your efforts.

An important part of communicating is receiving feedback. Always seek more feedback and resist the urge to defend your work. Doing this early and often is a productive path to progress.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

DAY 1

Homework Share

Before the workshop, you had a chance to observe an aspect of your operation with fresh eyes and to speak with someone about their experience of the activity. In this session, we'll share how it went and discuss what makes it challenging and highly rewarding.

NOTES & REFLECTION

A large grid of dotted lines for taking notes and reflections, consisting of 20 rows and 40 columns of dots.

DAY 1

Design Research 101

The Catalyst approach involves better understanding the situation before you jump to designing solutions. We call this Design Research -- research that informs the design process. It includes learning more about the experience of stakeholders, understanding systemic issues, and looking at the tangible aspects of the situation.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

Beliefs and Assumptions

Every organization and business process operate with respect to many conventions and orthodoxies -- that is, how the organization or industry tacitly agrees things should be done. Clients wait in a waiting room; a “phone tree” efficiently routes incoming calls; doctors meet with patients for about 15 minutes or less.

Many innovations break with convention to do something in a new, more valuable way. As a Catalyst, you must develop an ability to recognize and question the conventions and orthodoxies of your organization or system.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflection.

Team Time: Project Planning

OK, you now realize you're on a journey to learn new skills and innovate in a particular area of your organization. In this activity, you'll focus on how you will gather information about your project to better understand it. In essence, you are creating a research plan. It should include show and tell interviews, observation, gathering relevant data and experiencing activities and environments yourself.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

NOTES

People ignore design that ignores people. —FRANK CHIMERO

DAY 1

Review & Feedback

One of the most powerful tools in learning is to reflect on the experience and share with each other what has been challenging, exciting and still a little fuzzy. In fact, you'll notice after every activity, we have a Reflective Discussion. This reflection helps everyone synthesize new learning and opens up unique insights for everyone. As a Catalyst, you should facilitate reflective discussions with your colleagues throughout your project.

NOTES & REFLECTION

A large area of dotted lines for notes and reflection.

NOTES

People ignore design that ignores people. —FRANK CHIMERO

The background consists of several overlapping, semi-transparent shapes in various shades of teal and green. A large, light teal shape is in the top left. A darker teal shape is in the top right. A medium teal shape is in the bottom left. A dark green shape is in the bottom right. The text is centered over these shapes.

ACTIVITIES - DAY 2

DAY 2

Welcome Back & Review

You experienced a lot yesterday!

Reflect on ideas or principles that stood out, concepts that were difficult to understand and what you took away overall from the day.

Any feedback to make today even better?

NOTES & REFLECTION

A large area of dotted lines for writing notes and reflections.

Pitching Your Project

Innovation projects involve many variables and a lot of uncertainty. Rather than trying to make sure your ideas and work are bulletproof, share them before you're ready -- early and often. This allows you to take advantage of other's experience and point of view. It builds support for your project because people have meaningful involvement along the way.

NOTES & REFLECTION

A large area of dotted lines for notes and reflection.

Method: Qualitative Interviewing

There are many potential partners for your project beyond your project team and close colleagues. Community partners, client partners, and technology partners are just a few examples. Being able to recruit, collaborate, and understand others' experiences will set you up for success. Using open ended questions allows people to answer with their own unique content, which results in a richer data set for analysis.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

Method: Journey Mapping

A representation of a person and their experience helps deepen a team's understanding of that experience and maintain a focus on solving human-centered issues.

A Journey Map illustrates the individual's experience through a flow-chart like structure.

NOTES & REFLECTION

A large area of dotted lines for notes and reflection.

Method: Themes & Tensions (also called Affinity Clustering)

Write out facts, insights, quotes, on individual sticky notes from your research, then identify patterns, consistent behavior, tensions or pain points. Give these concepts names. Find additional evidence to reinforce or negate the idea. Settle on a small number of concepts, organized hierarchically with supporting evidence to construct a narrative that explains what happens, why it happens and implications for change.

NOTES & REFLECTION

A large grid of dots for writing notes and reflections. The grid consists of 20 rows and 40 columns of small, light blue dots, providing a structured space for handwritten notes and reflections.

Method: Reframing with “How Might We...?” Statements

Your project area does not, by itself, focus your creative problem solving. Rather, priority areas identified from research should guide your ideation. Examples include insights from your users’ experiences, clear pain points, workflow issues and other key challenges to creating value.

A good “How Might We..” question is generative and inspires creativity.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

Organizing Project Data

Pictures, audio recordings, notes, diagrams, sticky notes, sketches -- your project will generate a lot of tangible data. You should create a way to save and organize this data over the course of a project. Create an approach for both digital and physical assets.

NOTES & REFLECTION

A large grid of dots for writing notes and reflections. The grid consists of 20 columns and 20 rows of small, light blue dots, providing a guide for handwriting or drawing.

Project Definition & Research Planning

This is a second opportunity to plan how you will work on your project. It may seem redundant, but iteration is essential to getting a better and better understanding of what problem you are addressing.

First you'll get a chance to restate your project's objective. We'll share and discuss in the larger group. Then you'll have more team planning time to create a draft work plan, discuss and agree on how you will meet, roles on the team, etc.

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

Postcards from the Field

Sharing your work with others is so important when trying to build will around a design project. A “Postcard from the Field” offers a quick, visual way to share what you are learning and find others who might want to help you advance the work. How will you use this in the coming weeks?

NOTES & REFLECTION

A large grid of dots for notes and reflection, consisting of 20 rows and 40 columns of small, light blue dots.

Final Reflection

We covered a lot of new material. You began planning how you will apply the mindsets, behaviors and human-centered design techniques to your Catalyst project. As we bring the workshop to a close, what is your biggest take-away? What did you find most challenging? How are you thinking about your Catalyst project differently? Who are you most excited to work with on the project?

NOTES & REFLECTION

A large area of dotted lines for taking notes and reflections.

NOTES

People ignore design that ignores people. —FRANK CHIMERO

The background consists of several overlapping, semi-transparent shapes in various shades of teal and green. A large, light teal shape is in the upper left, overlapping a darker teal shape on the right. Below these, a medium teal shape overlaps a dark green shape in the bottom right corner. The word 'APPENDIX' is centered in white, bold, uppercase letters.
